# English

The Federation of Ikastolas (Basque-medium schools) has been running a multilingual Project since 1991. The main aim is to educate and prepare students as future citizens of our multilingual and multicultural Europe.

The English project has the following characteristics:

- An early start to learning English (at the age of 3).
- The development of coherent and structured teaching materials (from the ages of 3 to 16).
- The use of a constructivist approach whereby language is learnt by sharing meaningful experiences with others (dramatised stories, task based-learning, project work and CLIL).
- An emphasis on teacher-training and development.
